All easements and Reserves that overlap or cover all or portions of a Sanitary Easement shall be subject to the provisions of the Sanitary Easement within the overlap or cover areas. Work to facilitate surface water drainage within the overlap or cover areas is not restricted; however, any proposed new storm sewer pipes, inlets, catch basins, structures, or other storm water appurtenances or infrastructure features subsequent to those which were permitted with the original sanitary sewer improvements shall only be permitted if approved by the governing stormwater authority and the Delaware County Sanitary Engineer.

For any easement shown on this plat that contains a storm sewer, culvert, over land open ditch flood route, detention basin, retention basin and/or other storm water structure (herein referred to as storm sewer), the storm sewer rights are senior to the rights of any other public or private utility or interest utilizing the easement, except for overlap areas with a Sanitary Easement. Any costs associated with the damage, repair, replacement or relocation of any buried or above ground facility or structure that is necessary to allow the maintenance, repair or replacement of the storm sewer shall be the responsibility of the owner of said utility, facility or structure. When maintenance, repair or replacement of a storm sewer causes the removal of any trees, plantings, landscaping, fence, driveway or any other feature located within the easement, the replacement and cost of said items shall be the responsibility of the owner of the underlying property or homeowner's association if applicable.

Any landscape features, such as trees, fences, retaining walls, etc. in drainage easements shall be reviewed by the Delaware Soil and Water Conservation District (DSWCD) and the Delaware County Engineer's Office (DCEO) prior to installation. The DSWCD and DCEO will review the proposed improvements to assure that the improvements will not interfere with the storm water control facilities.

No buildings, sheds, decks, pools, or other such structures, or the footers or foundations of any structures or features shall be constructed above or below ground within the limits of any drainage easements unless said structure is approved in writing by the Delaware County Engineer's Office.

No other utility lines, conduits, mains, valves, boxes, pedestals, transformers, or other utility appurtenances are permitted within any Sanitary Easement unless they are approved on the signed sanitary sewer plans, or otherwise approved in writing by the Delaware County Sanitary Engineer, except that the rights granted to Delco Water Company, its successors, and assigns to install, service and maintain residential water services, meter crocks and appurtenances as designated on this plat are not restricted.

Other utility crossings within the Sanitary Easement are only permitted as described herein, unless they are approved on the signed sanitary sewer plans or otherwise approved in writing by the Delaware County Sanitary Engineer. Right angle or near right angle utility crossings ("near right angle" is defined as an angle between eighty (80) degrees and one-hundred (100) degrees) over, across, or under the sanitary sewer line and over, across, under, or through this sanitary easement are not restricted, except that all utility crossings under the sanitary shall be subject to the review and approval of the Delaware County Sanitary Engineer.

No buildings, sheds, decks, pools, or other such structures, or the footers or foundations of any structures or features shall be constructed above or below ground within the limits of the Sanitary Easement unless said structure is approved in writing by the Delaware County Sanitary Engineer.

Any landscaping features, such as, but not limited to, trees, fences, signs, stackable retaining walls, etc., within the Sanitary Easement shall be reviewed for approval by the Delaware County Sanitary Engineer prior to installation.

When maintenance, repair or replacement of public sanitary sewers, manholes, force mains, valves and other public sanitary appurtenances causes the removal of any trees, plantings, landscaping, fence or any other feature located within the Sanitary Easement, with the exception of driveways and pedestrian pathways, the replacement and cost of said items shall be the responsibility of the owner of the underlying property or homeowner's association is applicable.

The addition or removal of any dirt, soil, fill, or other changes to the ground elevation above the sanitary sewer or force main and/or within the Sanitary Easement shall be subject to approval of the Delaware County Sanitary Engineer.

The Delaware County Sanitary Engineer reserves the right to require that all earthwork within the Sanitary Easement be graded to such a level that will, in his or her opinion, not jeopardize the structural integrity of, infringe upon, or limit the County's reasonable access to the sanitary sewer or force main.

A non-exclusive easement is hereby specifically granted unto Del-Co Water Company Inc., its successors and assigns, for the location of water lines, valves and appurtenances within the rights-of-way hereby dedicated and within areas designated hereon as Utility Easement, Drainage Easement, or Del-Co Water Easement that are located alongside the rights-of-way hereby dedicated. Also granted is the right of Del-Co Water Company Inc., to install service and maintain water meter crocks and appurtenances in said easement areas alongside said rights-of-way.
