 - - - - - SETBACK
- REFERENCE SURVEY: O.R. 813, PG. 364-369
BASIS OF BEARING: The bearings as shown hereon are relative to GRID NORTH OF THE OHIO STATE PLANE COORDINATE SYSTEM, NAD 83 DATUM

General Plat Notations:

- Non-exclusive utility easements are platted for the construction, operation and maintenance of public and private utilities, storm water management, and service connections thereto, above and beneath the surface of the ground;
- Easements are granted within dedicated road right-of-ways, non-exclusive utility easements, and designated waterline easements to Del-Co Water Co., Inc. and other water utilities for installation and maintenance of waterlines, valve, meter crocks and appurtenances;
- On file with county engineering, building, health and platting authorities are plans indicating the nature and location of various subdivision improvements;
- If the plat includes lots served by household sewage treatment systems, a note shall be placed on the plat that states: "Deviation in house locations and location and design of household sewage treatment systems shown on development plans on file with the Delaware General Health District may be allowed only if alternate locations and designs are submitted to, coordinated with, and approved by building, zoning and health authorities;
- Unless waived by Sanitary Engineer, a note shall be placed on the plat that states: "Owners, their successors, heirs or assigns of these lots agree when a central sanitary sewer system becomes available, the lot shall be connected to it. Acceptance of title to a lot in this subdivision shall constitute waiver of future notice or hearing on this requirement. This covenant shall be included in conveyance of title for said lots."
- Unless otherwise waived by the Sanitary Engineer, a note shall be placed on the plat that states: "Sanitary Sewer Easements are solely for construction, operation and maintenance of public and/or private sanitary sewers and service connections, and may be crossed by other utilities;"
- Unless otherwise waived by the County Engineer, a note shall be placed on the plat that states: "Be advised: A sub-surface drainage system may exist on this site. The system and/or outlet if located on this property must be maintained at all times;"
- Zoning setbacks reflect current zoning standards at the time of the zoning inspector's signature of the final plat and are not subdivision plat restrictions.

Del-Co Water Company Standard Easement Statement:

A non-exclusive easement is hereby specifically granted unto Del-Co Water Company Inc., its successors and assigns, for the location of water lines, valves and appurtenances within the rights-of-way hereby dedicated and within areas designated hereon as "Utility Easement" or "Drainage Easement" that are located alongside the rights-of-way hereby dedicated. Also granted is the right of Del-Co Water Company Inc., to install, service, and maintain water meter crocks and appurtenances in said easement areas alongside said rights-of-way. The easement area shall be for the unobstructed use of Del-Co Water Company, Inc. Placement of fences, walls, pillars, trees, gardens, shrubberies, and other surface features is strictly prohibited.

Note: See the restrictive covenants recorded with the Homeowners Association Documents for additional information and restrictions.

Drainage Maintenance Petition Recorded in the Delaware County Commissioner's Journal, Resolution No. 07- Journal Date 5-14-07

The property, shown hereon, is situated in Zone X (outside the 500-year flood plain) as indicated on Map No. 390410285 K of the Flood Insurance Rate Map for Delaware County, Ohio and Incorporated Areas, and therefore, is not within a flood hazard zone. No field surveying was performed to determine this zone.

Plat Notes for RPC plans:

- Easements are hereby reserved, in, over, and under areas designated on this plat as Drainage and/or Utility Easements. Easements designated as Drainage Easement and Drainage & Utility Easements permit the construction, operation, and maintenance of all public and quasi-public utilities above, beneath, and on the surface of the ground and, where necessary, for the construction, operation, and maintenance of service connections to all adjacent lots and lands and for storm water drainage.
- Easements designated as "Sanitary Easement" shall mean an exclusive sanitary easement over, through, under, within, upon, and across the area described on the plat, together with ingress and egress over reasonable routes across Grantor's tracts that adjoin the easement area when exercising the purposes of this easement, exclusively for construction, operation and maintenance of public and/or private sanitary sewers, service connections, manholes, force mains, valves, and other sanitary appurtenances. Sanitary Easements may be crossed by other utilities as expressed herein
- Within those areas of land designated "Drainage Easement" on this plat, an additional easement is hereby reserved for the purpose of constructing, operating, and maintaining major storm water drainage swales and/or other above ground storm water drainage facilities. No above grade structures, dams, or other obstructions to the flow of storm water runoff are permitted within Drainage Easement areas as delineated on this plat. Easement areas shown hereon outside of the platted area are within lands owned by the undersigned and easements are hereby reserved for the uses and purposes expressed herein.
- All easements and reserves that overlap or cover all or portions of a "Sanitary Easement" shall be subject to the provisions of the "Sanitary Easement" within the overlap or cover areas. Work to facilitate surface water drainage within the overlap or cover areas is not restricted; however any proposed new storm sewer pipes, inlets, catch basins, structures, or other storm water appurtenances or infrastructure features subsequent to those which were permitted with the original sanitary sewer improvements shall only be permitted if approved by the governing stormwater authority and the Delaware County Sanitary Engineer.
- For any easement shown on this plat that contains a storm sewer, culvert, over land open ditch flood route, detention basin, retention basin and/or other storm water structure (herein referred to as storm sewer), the storm sewer rights are senior to the rights of any other public or private utility or interest utilizing the easement, except for overlap areas with a "Sanitary Easement". Any costs associated with the damage, repair, replacement or relocation of any buried or above ground facility or structure that is necessary to allow the maintenance, repair or replacement of the storm sewer shall be the responsibility of the owner of said utility, facility or structure. When maintenance, repair or replacement of a storm sewer causes the removal of any trees, plantings, landscaping, fence, driveway or any other feature located within the easement, the replacement and cost of said items shall be the responsibility of the owner of the underlying property or homeowner's association if applicable.
- Any landscape features, such as trees, fences, retaining walls, etc. in drainage easements shall be reviewed by the Delaware Soil and Water Conservation District (DSWCD) and the Delaware County Engineer's Office (DCEO) prior to installation. The DSWCD and DCEO will review the proposed improvements to assure that the improvements will not interfere with the storm water control facilities.
- No buildings, sheds, decks, pools, or other such structures, or the footers or foundations of any structures or features shall be constructed above or below ground within the limits of any drainage easements unless said structure is approved in writing by the Delaware County Engineer's Office.
- No other utility lines, conduits, mains, valves, boxes, pedestals, transformers, or other utility appurtenances are permitted within any Sanitary Easement unless they are approved on the signed sanitary sewer plans, or otherwise approved in writing by the Delaware County Sanitary Engineer, except that the rights granted to Delco Water Company, its successors, and assigns to install, service and maintain residential water services, meter crocks and appurtenances as designated on this plat are not restricted.
- Other utility crossings within the Sanitary Easement are only permitted as described herein, unless they are approved on the signed sanitary sewer plans or otherwise approved in writing by the Delaware County Sanitary Engineer. Right angle or near right angle utility crossings ("near right angle" is defined as an angle between eighty (80) degrees and one-hundred (100) degrees) over, across, or under a sanitary sewer or force main and over, across, under, or through the sanitary easement are not hereby restricted, except that all utility crossings under a sanitary sewer or force main shall be subject to the review and approval of the Delaware County Sanitary Engineer.
- No buildings, sheds, decks, pools, or other such structures, or the footers or foundations of any structures or features shall be constructed above or below ground within the limits of the Sanitary Easement unless said structure is approved in writing by the Delaware County Sanitary Engineer.
- Any landscaping features, such as, but not limited to, trees, fences, signs, stackable retaining walls, etc., within the Sanitary Easement shall be reviewed for approval by the Delaware County Sanitary Engineer prior to installation.
- When maintenance, repair or replacement of public sanitary sewers, manholes, force mains, valves, and other public sanitary appurtenances causes the removal of any trees, plantings, landscaping, fence, or any other feature located within the Sanitary Easement, with the exception of driveways and pedestrian pathways, the replacement and cost of said items shall be the responsibility of the owner of the underlying property or homeowner's association if applicable.
- The addition or removal of any dirt, soil, fill, or other changes to the ground elevation above the sanitary sewer or force main and/or within the Sanitary Easement shall be subject to approval of the Delaware County Sanitary Engineer.
- The Delaware County Sanitary Engineer reserves the right to require that all earthwork within the Sanitary Easement be graded to such a level that will, in his or her opinion, not jeopardize the structural integrity of, infringe upon, or limit the County's reasonable access to the sanitary sewer or force main.

We/I, the undersigned, being all the owners and lien holders of the land platted herein, certify that the attached plat correctly represents our/my "Greyland Estates Section 1, Phase B" a subdivision of lots numbered 322 to 347 inclusive, and do hereby accept this plat and do voluntarily dedicate 3.310 acres for public road right-of-way as shown hereon and not heretofore dedicated.

GREYLAND ESTATES, SECTION 1, PHASE B

The reserve area ownerships will be relinquished to Greyland Estates, Section 1, Phase B Homeowners Association, at that time it will be their responsibility, as well as individual lot owner, to protect and maintain these areas as shown on the subdivision plat for Greyland Estates, Section 1, Phase B.

Delaware County Engineer notes:
All reserve / open spaces delineated on this plat shall be accessible to Delaware County, its successors and assigns, for drainage maintenance purposes.

SECONDARY OFF-SITE SEPTIC EASEMENTS
The secondary off-site septic easements shown on this subdivision plat for Greyland Estates, Section 1, Phase B are for the exclusive use of a replacement area for the primary on-site septic systems as shown on the subdivision plat. The soils in these areas are not to be disturbed in any manner. Structures, landscaping, paved pathways, gardens, compaction of the soil or other disturbance of the soil substructure are not permitted. These areas are to be maintained as natural open space. Minimal mowing and removal of dead or unsightly debris are permitted in order to maintain the character of natural open space. Mowing of these areas shall be done with rubber tired mowers only when moisture conditions are dry enough as not to create ruts or undo compaction of the soils.

The secondary off-site septic easement areas will be under the ownership of the developer until such time that developer relinquishes ownership to Greyland Estates, Section 1, Phase B Homeowners Association, at that time it will be their responsibility, as well as individual lot owner, to protect and maintain these areas as shown on the subdivision plat for Greyland Estates Section 1, Phase B. The Delaware County General Health District reserves the right to inspect these areas at anytime and it will be the developers/Greyland Estates, Section 1, Phase B Homeowners Associations (depending who has ownership at the time) responsibility to comply with any recommendations or items needing attention.

If central sewer becomes available for the subdivision, the secondary off-site septic easements shall revert to open space at the time that each individual lot is connected to the central sewer system.
